

HOI MAN YUEN

EXPERIENCED UNITY DEVELOPER

Nationality:	British	Address:	London, SE13
Phone Number:	+44 7732 290428	Email Address:	hoiman.k.yuen@gmail.com
Portfolio:	https://hoimankyuen.github.io/	LinkedIn:	www.linkedin.com/in/hoimankyuen

PROFILE

Experienced Unity Developer and C# programmer with 8 years of professional experience, and extensive knowledge across multiple areas of the development process. Passionate about game development, created and released 8 games on itch.io.

SKILLS

Specialised Skills: Unity, C#, Git

Engineering Skills: Gameplay system development, UI programming, Architecture design, Optimisation & profiling, Tooling & maintenance, Technical art, Shader programming, VR/AR development, Mobile development, Multiplayer development

Other Skills: C++, Java, HLSL, Blender, Adobe Photoshop, Audacity

Languages: English, Chinese(written), Cantonese (spoken), Japanese

WORK EXPERIENCE

Unity Developer - Cloth Cat Ltd., UK May 2026 - Oct 2026

- Developed 3 **online multiplayer** digitalised board games
- Created future-proofed reusable systems that leads to increase in development speed

Unity Developer - Xploro Ltd., UK Jan 2024 - Dec 2025

- Implemented 7 games within the **mobile** app for children in hospitals, with good client satisfaction
- Built efficient and scalable **UI systems** for colour theming, Arabic layout support and loading screen
- Produced clean and documented code with a high QA acceptance rate
- Accelerated development and game-balancing workflows by creating a unified game framework and multiple internal **Unity editor tools**, speeding up total development time
- Improved maintainability of complex codebases by refactoring legacy systems and architectures
- Performed code reviews and provided support for other developers
- Reduced potential production issues through **close collaboration across disciplines**
- Researched and developed content using AR, body-tracking, and other emerging technologies

R&D Engineer / Unity Developer - Hactis Ltd., Hong Kong Aug 2019 - Mar 2023

- Led the design and development of the **foundation** of a general-purpose multiplayer VR content-creation system in Unity
- Developed a range of **VR** gamified interactive applications with positive client receptions
- Provided mentoring and guidance to junior developers
- Improved development efficiency by building abstraction tools and reusable Unity plugins
- Created procedurally generated graphics and shaders to deliver UI and visual enhancements

Summer Intern - Versitech Ltd., Hong Kong Jun 2018 - Aug 2018

- Developed a AR first-person shooter and a VR matching game for exhibition booths

Unity Programmer - Uniques Digital Game Ltd., Hong Kong Sep 2014 - Jul 2015

- Developed new mechanics and levels for a mobile MMO (Naval Front-line)
